

Which Spectral product is best for you?

Spectral.DNC®
NEXT GENERATION TECHNOLOGY
FOR MEN WITH SEVERE THINNING
OR SHEDDING HAIR

Men

- Beginning or moderate stages of hair loss
- Receding hairline
- Maintenance after using Spectral.DNC-L
- Eyebrow regrowth

Women

- Severe or visually noticeable stage of hair loss
- Receding hairline
- Eyebrow regrowth

Spectral.RS®
WORLD'S MOST EFFECTIVE
TOPICAL TREATMENT
FOR THINNING HAIR

Men

- Even distribution of hair thinning
- Hair-follicle antiaging

Women

- Beginning/moderate stage of hair loss/thinning
- Hair-follicle antiaging
- Allergy to minoxidil
- Pregnancy or breast-feeding
- Conflict with blood-pressure medication

Spectral.DNC-L®
TOPICAL TREATMENT FOR
MOST ADVANCED STAGES OF THINNING HAIR

Men only

- Advanced stages of hair loss
- Large areas of scalp with no hair
- Receding hairline

Spectral.DNC vs. others

Spectral.DNC®
NEXT GENERATION TECHNOLOGY
FOR MEN WITH SEVERE THINNING
OR SHEDDING HAIR

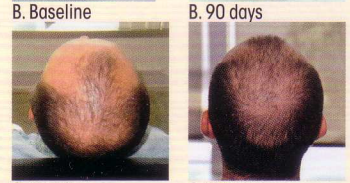

- Deep penetration, 12-hour persistence
- Encapsulated, research-grade minoxidil
- Strong hair-growth properties
- No alcohol, soluble in water
- Desirable cosmetic finish
- Adenosine
- Aminexil
- Amino-acid complex
- Lupine extract
- Nano copper peptides
- Procyanidin B-2
- Retinol
- T-flavanone
- Thymosin B4
- Taurine
- Vitamins and minerals

- Superficial penetration, 15-minute persistence
- Standard minoxidil
- Irritation, redness, inflammation
- High alcohol, soluble in oil
- Brittle, sticky cosmetic finish
- No additional active ingredients

Clinically proven to regrow hair

A 90-day clinical trial assessed the safety and effectiveness of Spectral.DNC in males suffering from male pattern baldness. Lab technicians applied the product to the volunteers twice each day for 90 days.

Subjects were evaluated for adverse events, and the treatment was proven to be safe.

Results of the study showed Spectral.DNC to be effective in stopping hair loss and promoting hair growth.

A significant increase in terminal-hair growth was seen in 14 of the 15 subjects, who self-evaluated their level of regrowth:

No growth	6.7%
Minimal growth	20.0%
Moderate growth	53.5%
Dense growth	26.7%

HAIR-REGROWTH TREATMENTS

Solutions in a shampoo and conditioner

REVITA® SHAMPOO

Hair-growth-stimulating shampoo

Revita is the most efficient hair-growth-stimulating shampoo available — the final result of DS Laboratories' cutting-edge research. Revita combines precious materials specially formulated to maintain scalp vitality and act on follicular dysfunction, to achieve best results in a short time.

The design includes no sodium lauryl sulfate or sodium laureth sulfate, which are low-cost detergents commonly used in shampoos and cleansers linked to skin irritation, drying, and hair loss.

Revita uses premium ingredients at high concentrations. They are chosen for their

properties and are obtained through a chemical-free extraction process to preserve maximum efficacy. They include caffeine, copper peptides, spin traps, ketoconazole, rooibos, methylsulfonylmethane (MSM), apple polyphenol (procyanidin B-2), carnitine tartrate, ornithine, taurine, cysteine, emu oil, and biotin.

By combining antioxidant effects, anti-dihydrotestosterone properties, powerful hydrating molecules, hair-growth stimulants, and structural amino acids, Revita brings you the most effective hair-growth-stimulating shampoo available, with absolutely no equivalent in the market.

REVITA®

REVITA.COR® CONDITIONER

Bio-adhesive hair-growth-stimulating conditioner

Revita.COR delivers state-of-the-science hair-regrowth technology that builds on the legendary success of Revita shampoo. This conditioner establishes a new benchmark for the comprehensive synthesis of hair-regrowth compounds.

Unlike common conditioners, Revita.COR contains powerful ingredients known to stimulate hair growth. These compounds come encapsulated within hydrophobic, bio-adhesive, cationically charged lipospheres. This next-generation delivery system adheres to the scalp tenaciously, keeping active ingredients attached and working for 12 hours or longer to achieve maximum

effect even while sweating or swimming. Ultra-premium compounds in Revita.COR, each evaluated and proven via clinical trials, provide significant benefits against follicular dysfunction.

Unique among conditioners, Revita.COR employs plant-based stem cells, which exhibit much of the same plasticity as human stem cells, plus a powerful inhibitor of 5 α -dihydrotestosterone, the hormone that triggers male pattern baldness. Other key ingredients are apigenin, arginine, biotinyl tripeptide-1, caffeine, citrulline, ginseng, inositol, lupine, nano copper peptides, niacinamide, spin traps, tyrosine, and zinc.
